

# Tommaso Lo Piparo

## AI Engineer · Software Engineer

AI Engineer e Software Engineer con solida esperienza backend e nello sviluppo di soluzioni GenAI per contesti enterprise.

Specializzato in Node.js, TypeScript e Python, architetture a microservizi, LLM, RAG e conversational AI.

Esperienza nella modernizzazione di sistemi legacy e nel delivery di prodotti AI affidabili e scalabili su Azure, IBM Cloud e AWS. Progetti personali disponibili su GitHub.

### PROFESSIONAL EXPERIENCE

#### AI Engineer · Software Engineer

Mauden S.p.A., Milano

Nov 2025 – oggi

- Progettato soluzioni GenAI e conversational AI enterprise, incluse orchestrazione e componenti vocali.
- Integrato LLM, RAG, prompt engineering e API in workflow aziendali, gestendo delivery su Azure e IBM Cloud con Docker, CI/CD e pratiche DevOps.
- Modernizzato oltre 30 servizi dell'ecosistema MPG per Gruppo api (rete IP), riducendo di circa il 35% i tempi di rilascio e del 25% l'effort di manutenzione tramite l'evoluzione di microservizi e integrazioni backend.

#### Senior Backend / Backend Developer

Colzani S.p.A. (Apr–Ott 2025) · Vicsam Group (2021–2025)

- Colzani S.p.A.: sviluppato backend e integrazioni per piattaforme aziendali.
- Vicsam Group: realizzato applicazioni SaaS e servizi in Node.js, TypeScript, PHP/Laravel e Python.
- Progettato API REST, autenticazione JWT, integrazioni CRM/ERP, pipeline CI/CD e infrastrutture Docker e AWS/VPS.

### SKILLS

AI Engineering · GenAI · Conversational AI · Azure · IBM Cloud · DevOps · Docker · CI/CD · LLM · RAG · LangChain · LangGraph · IBM watsonx Orchestrate · Python · TypeScript · Node.js · Microservices

### TECHNICAL SKILLS

- Linguaggi & Framework: Node.js, TypeScript, JavaScript, PHP (Laravel), Python (FastAPI, Flask), Express, NestJS
- Database: PostgreSQL, MySQL, MongoDB, Redis
- Cloud & DevOps: Azure, IBM Cloud, AWS, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI), PM2
- AI Engineering: LLM, RAG, agenti AI, conversational AI, LangChain, LangGraph, IBM watsonx Orchestrate, OpenAI API
- Architetture: Microservizi, Event-driven, RESTful API, GraphQL, ETL
- Strumenti: Git, GitHub, Bitbucket, GitLab, n8n, Jira, Agile/Scrum

### LANGUAGES

Italiano - Madrelingua

Inglese - C1

Spagnolo - B1

### SOFT SKILLS

Forte orientamento ai risultati e problem solving

Mentalità analitica e attenzione al dettaglio

Passione per innovazione, automazione e AI

# Tommaso Lo Piparo

## AI Engineer · Software Engineer

AI Engineer and Software Engineer with solid backend experience and a track record of building enterprise GenAI solutions.

Specialized in Node.js, TypeScript, Python, microservices, LLMs, RAG, and conversational AI.

Experienced in modernizing legacy systems and delivering reliable, scalable AI products on Azure, IBM Cloud and AWS. Personal projects available on GitHub.

### PROFESSIONAL EXPERIENCE

#### AI Engineer · Software Engineer

Mauden S.p.A., Milan

Nov 2025 – Present

- Designed enterprise GenAI and conversational AI solutions, including orchestration and voice components.
- Integrated LLMs, RAG, prompt engineering, and APIs into business workflows, delivering on Azure and IBM Cloud with Docker, CI/CD, and DevOps practices.
- Modernized 30+ services across the MPG ecosystem for Gruppo api (IP fuel network), cutting release time by approximately 35% and maintenance effort by 25% through improved microservices and backend integrations.

#### Senior Backend / Backend Developer

Colzani S.p.A. (Apr–Oct 2025) · Vicsam Group (2021–2025)

- Colzani S.p.A.: developed backend services and integrations for enterprise platforms.
- Vicsam Group: built SaaS applications and services with Node.js, TypeScript, PHP/Laravel, and Python.
- Designed REST APIs, JWT authentication, CRM/ERP integrations, CI/CD pipelines, and Docker and AWS/VPS infrastructure.
